

Acclaim SMS Text Messaging

IVR Managed Services

Acclaim Telecom Services provides integrated SMS text messaging with our cloud based IVR Services for a variety of applications ranging from outbound notifications, marketing campaigns, to financial and banking services.

How Can I Use SMS Text Messaging

The sky's the limit when it comes to ways to effectively use SMS text messaging. Here are just a few of the many ways in which SMS text messaging can be effectively used:

- Send confirmation notices for completed transactions
- Order updates, store pick-up or delivery confirmations
- Provide multi-stage user authentication for healthcare, banking, and financial services
- Password reset
- Special promotion announcements or customer appreciation acknowledgements
- Mobile coupons, promotion and discount codes
- Drive traffic to your company's website for additional services or information
- Mobile donations and fund raising
- Outbound notifications for all types of announcements
- Quick polls or contests
- Direct political polls through IVR or web-based surveys
- Drive customer loyalty programs
